III. Statistical Returns.

REVIEW ON THE EDUCATIONAL REPORT
FOR 1875—76.

1. The principal measure introduced during the year under review has been the formation of the Bangalore High School into a Central College teaching up to the standard of the Bachelor of Arts University examination, thus "concentrating the higher instruction preparatory for the taking of degrees into one institution for this Province." The two principal schools in the Ashtagram and Nagar Divisions, *viz*, Raja's High School, and the Shimoga District School, have been at the same time constituted as High Schools teaching up to the F. A. standard. The professional staff of the Central College will be strengthened by the appointment of a Vice Principal, and under the orders of Her Majesty's Secretary of State for India, endeavours will be made to obtain the services of a Native gentleman to fill this post.

2. The change in the status of the Shimoga High School has rendered an addition to the staff of teachers necessary. Further a system of scholarships has been instituted to connect the various schools with those of a higher grade and finally with the Central College.

3. Contemporaneously with these changes, the scale of fees in the High Schools has been raised, and it is satisfactory to learn that this revision has not at the outset had the effect of reducing the attendance at these schools, excepting to an inconsiderable extent in the District schools.

4. Thirty-eight new Government schools, of which 30 are Hobli schools, were opened during the year, thus raising the total number of this class to 730. The number of aided schools has also been increased and now stands at 114.

5. The number of pupils in both the Government and aided schools was 36,309 or 4,732 more than in 1874—75. The increase would appear to be mainly due to more pupils in the "Lower" schools, the number having advanced from 17,828 in 1874—75 to 21,048 in 1875—76.

6. The number of unaided schools is said to have increased by 14 and now stands at 1,350, but the number of pupils had decreased by 525 and was only 17,882.

7. The total amount from State and Local Funds expended on education was Rs. 3,05,752, and the total receipts from all sources paid into Government Treasuries amounted to Rs. 1,31,387, so that the net cost to Government for education was Rs. 1,74,365. This would have been probably less, but fees at the higher rate were only collected for a part of the year.

8. From the figures given in para 21 of the report it appears that in those schools where the Government realize fees the average sum paid by each pupil is a little higher than that levied in unaided schools, and considerably above that exacted in aided schools.

9. Although the aggregate amount realized from fees in Government schools is shewn to be much less than that realized in other schools, this is apparently due to the circumstance that the larger number of Government schools, *i. e.* 712 out of the total of 730, are those of the "Middle" and "Lower" class.

University Examinations.

10. The results exhibited in paras 24 to 27 of the report as to the comparatively small proportion of candidates for degrees and university honors who succeeded in passing the examination are not satisfactory, and are due, as pointed out by the Director, to the difficulty found in restraining the students from presenting themselves for examination before they are sufficiently prepared. This may be checked to some extent by the influence of the masters, in preventing the boys from entering upon what must be frequently a speculation, as well as by the course suggested by Mr. Rice, in not admitting pupils prematurely to the Matriculation classes.

High Schools.

11. Owing to the changes introduced during the year, and the separation of these three schools from the higher class schools, a comparison of the work during the year under review with that of the previous year cannot be readily made.

12. The attendance at the Bangalore Central College, owing chiefly perhaps to the changes in the staff necessitated by the wants of the two new High Schools, was less than in the previous year. On the other hand there was an increase both in pupils and amount realized by fees in the Mysore and Shimoga High Schools.

Higher Class Schools.

13. There are 5 schools of this class situated in the head-quarter towns of those Districts where there are no High Schools. There has been a slight falling off in the number of pupils who attended the English branch, while there was an increase in the Kanarese branch. With the exception of the school at Kolar the general condition of these schools is reported to be satisfactory.

Middle Class Schools.

14. This class of schools is subdivided into Anglo-vernacular (5) Vernacular (39). The attendance at the different schools has been good, and in many there has been an increase in the number of pupils. With regard to the proposal indicated in paras 61 and 62 of the report to comply with the desire which has always existed for an increase of schools in which English is taught, the Chief Commissioner would remark that the opening of an English class in a Taluk school, the additional cost involved on which would be defrayed by extra fees, might be unobjectionable in principle, but there is some danger in fostering this desire for English teaching among boys of the classes taught in such schools, who would be apt to neglect the study of their own language in order to seek proficiency in that which, as they conceive, would fit them better for employment in the public service. If boys of a more advanced age who have been well grounded in the Vernacular are willing to pay for higher instruction, there should be no difficulty in their resorting to the District schools, where the education in English would be of a superior character than what would be taught by an occasional master of a Taluk school.

Lower Class Schools.

15. The total number of Taluk schools, *viz.* 67, is the same as in last year. Three Kanarese schools were closed, while 3 new Hindustani

ones were opened. There was an increase in the number of pupils attending these schools, which proves that their popularity has not decreased. From the reports of the Inspectors however it would appear that the condition of these schools is not as satisfactory as it might be.

16. The number of Hobli schools was increased by 30, and now stands at 592, where 18,068 pupils or 3,033 more than in the previous year receive instruction. The condition of these schools may on the whole be considered satisfactory. From the report made by the Inspectors it would appear that out of a total of 592 schools only 137 were returned as "not satisfactory." The condition of the remaining 455 was either fair or good, and 47 were returned as very good. The Director reports that not one-half of the applications for new schools of this kind can be complied with. This is favorable testimony to the estimation in which these schools are held by the people. The annual cost of educating each pupil was Rs. 3—7—7, and the whole of the expenses connected with this class of schools are paid from Local Funds.

Female Schools.

17. The number of girl schools was the same as last year, but the attendance has not increased in these schools. In the Melkote hobli school the number of girls increased so largely that separate premises have been assigned for their use, and the progress they have made under a Brahmin widow is said to be satisfactory. In the new hobli school opened at Vadagenhalli 7 girls were studying with the boys.

Normal Schools.

18. There were 4 schools of this class at work during the year, with an average number of 128 pupils. At the examination held 48 students succeeded in obtaining certificates of proficiency and were appointed to take charge of schools. The condition of the Hindustani Normal School is reported to be unsatisfactory.

Special Schools.

19. The new school of Engineering and Natural Science was opened on the 1st May 1875, and the results as stated in paras 96 to 100 of the report may be considered as on the whole favorable. The improvement which has shewn itself as the course proceeded is due undoubtedly to the

strenuous efforts of the Principal Mr. E. Gramatzki and his Assistant Mr. Subba Rayar to maintain a high standard in the class of instruction imparted.

Private Institutions under Government Inspection.

20. The number of these institutions receiving grants-in-aid from Government was 114 or 5 more than in the previous year. The amount contributed by Government was increased by Rs. 2,479, and during the year Rs. 46,721 were paid on this account. The average daily attendance in all schools has advanced from 6,074 to 6,712 in the year under review; of these 4,532 were receiving instruction in the boys' schools and 2,049 in the girls' schools. As is to be expected, there have been fluctuations in the numbers attending the different schools, some have increased, others decreased, but there is nothing special with regard to any one school which calls for particular notice.

21. There were on the rolls of the Anglo-Indian-Aid Association 51 boys and 21 girls. Forty of the boys were apprenticed and learning trades. Endeavours should be made to overcome existing difficulties in giving girls training in useful trades and occupations.

Private Unaided Schools.

22. The number of schools has increased by 14, and was 1,350 with an attendance of 17,882 pupils or 826 more than in the previous year. The returns are not quite to be trusted, and the Director reports that endeavours will be made during this year to obtain more accurate information with regard to the operations of this class of schools.

23. The report under review has been as usual drawn up with commendative care and fulness by Mr. Rice, and the Chief Commissioner gladly testifies to the ability with which this Officer continues to labor for the improvement of the Department under his charge.

"By Order,"
T. CLARKE,
Offg. Secretary.

9th October 1876.

OFFICE OF THE DIRECTOR OF PUBLIC INSTRUCTION,
DATED BANGALORE, 20*th July* 1876.

From

LEWIS RICE, ESQ.,
Director of Public Instruction in Mysore.

To

MAJOR T. CLARKE,
Offg. Secretary to the Chief Commissioner of Mysore.

SIR,

I have the honor to submit my Report on the progress of Public Instruction in Mysore for the year ending 31st March 1876.

Increase of Pupils.

2. The year has been marked by the outbreak of cholera in nearly every part of the Province, in some places working destruction with startling rapidity and virulence. The Department has suffered many losses by death from this cause among masters, especially of Hobli schools. Students under training for masterships were also carried off, and the Normal schools in consequence deserted in a panic. Many large schools had to be closed for a period, until public alarm was allayed. These untoward events have tended materially to retard progress, and we are not yet quite free of the scourge. But it is gratifying to report that, spite of these drawbacks, the total number of pupils under instruction exhibits an increase higher than that of last year; when, as noted in the report for that period, a greater advance was made than in any other year since the formation of the Department, except the one in which the Hobli school system came into operation.

New Measures.

3. The year now under review has also seen the introduction of several measures calculated, it is believed, to produce very important results on the education of the country. Among these the most prominent are,—the constitution of a Central College, and the affiliation to it of

collegiate schools in each Division: also the establishment of a school of Engineering and Natural Science, for the purpose of training a select body of young men for every grade of appointment in the Public Works, Topographical and Revenue Survey, and Forest Departments. Arrangements have also been set on foot, at the request of, and in communication with, the Military Assistant, for providing instruction for such members of the Siledar and Barr forces, or their children, as are prepared to take advantage of it. At the same time considerably enhanced rates of fees have been adopted for the higher class of schools. That their attendance of pupils has not in consequence diminished may perhaps be accepted as a tacit admission by the people generally that the style of education now given is worth more.

Numerical Results.

4. At the close of the year there were in connection with the Department 844 schools containing 36,309 pupils, against 808 last year with 31,577 pupils. New schools have therefore been established to the number of 36, and an addition has taken place of 4,732 pupils, or at the rate of 15 per cent.

Comparison with last year.

5. A comparison, as made below, with the figures for last year, shews that the advance was at the rate of 16 per cent in Government schools and of 11·6 per cent in aided schools:—

Year.	Government Schools.	Pupils.	Aided Schools.	Pupils.
1875—76 ...	730	27,711	114	8,598
1874—75 ...	699	23,878	109	7,699
Increase.....	38	3,833	5	899

Though the total number of aided schools was increased by only 5, there were actually 8 new ones added to the list. The difference is due to the withdrawal of aid from 3 others.

6. The unaided schools are returned at 1,350, or 14 more than last year, with 17,882 pupils, or 525 less. By adding these, we obtain a total for the Province of 2,194 schools of all classes, giving instruction to 54,191 pupils, or 1 in 93 of the population.

Schools and Pupils, Grand Total.

7. On separating the sexes, we find there are 50,846 boys and 3,345 girls; 33,005 of the former and 3,304 of the latter being under instruction in Government or aided schools. These are composed of 30,631 Hindus, 3,640 Muhammadans and 2,038 others, which includes 883 Europeans, 581 Eurasians and 574 Natives.

Classes of Pupils.

8. The list given below exhibits the number of schools connected with Government that fall under each grade, and their strength as regards pupils. The classification is subject to the remarks made in last year's report under this section :—

Classes of Schools.

Class of Schools.	Government.		Aided.	
	Schools.	Pupils.	Schools.	Pupils.
College and Collegiate Schools	3	1,086	...	...
Boys' Schools.				
Higher	5	601	6	1,268
Middle	44	3,426	32	2,337
Lower	659	21,048	41	2,233
Girls' Schools.				
Higher	...	...	3	363
Middle	...	...	9	771
Lower	9	346	21	1,495
Normal Schools ...	4	128	...	...
Special „ ...	6	1,076	2	131
Total.....	730	27,711	114	8,598

II. CONTROLLING AGENCIES.

9. *Inspectors.*—Mr. Hodson has held charge of the First Circle, and Mr. Marsden of the Second Circle, throughout the year. The statements in their reports return 310 schools with 11,067 pupils as under the former, and 270 schools with 11,197 pupils as under the latter. Both officers have been active and successful in the supervision of the schools over which they have control. I count on their continued exertions in endeavouring to improve the general system and scope of instruction.

10. *Deputy Inspectors.*—Mr. Pope remained as Deputy Inspector in the Head-Quarter Circle till the middle of May, when he was transferred to the charge of the Raja's High School at Mysore. Mr. Venkatapataiengar, Head Master of the Chikmagalur District School, was appointed in succession, to act in the appointment, and joined on the 9th of August.

11. This is the highest office at present held by a Native in this Department, and it is gratifying that a candidate was forthcoming from the ranks of the educational service itself. I trust that he may prove equal to the work of this difficult district. But so great has been the drain upon well-educated and promising young men from our schools, for the more attractive positions now open to them as Attachés, Munsiffs, Engineers, Police Inspectors and the like, that delay has occurred in filling up another vacancy which exists in this grade.

12. *Sub-Deputy Inspectors.*—An additional appointment was made under this head, thereby increasing the staff of Sub-Deputy Inspectors to 15. Another man is still required for the Hindustani Department. The changes that have occurred are the following. Krishna Rao, B. A. broke down completely, and reverted to an assistant mastership in the Raja's High School. His appointment was an experiment; but it is clear, for reasons stated last year, that this grade must, as a rule, be filled up from among the vernacular masters. Múrti Rao, from the Nundydroog Normal School, was given the place; being succeeded by Appalachari, of the Chintamani School. To the charge of the Ashtagram Training School, Venkat Rao was appointed, who for several years has kept up at Holehonnur the best Taluk school in the Second Circle.

13. The following therefore is the list of Sub-Deputy Inspectors as it now stands :—

Name.	District or Charge.	Station.
Srinivasaiengar ...	Bangalore West ...	Bangalore.
Ramacharlu ...	Bangalore-Kolar Junction ...	Devanhalli.
Timmappa ...	Kolar North ...	Sidlagatta.
Shamachari ...	Túmkúr-Hassan Junction ...	Kadaba.
Raghavendra Rao ...	Túmkúr-Chitaldroog Junction	Sira.
Dakshina Múrti Shastri...	Mysore West ...	Mysore.
Múrti Rao ...	Mysore-Hassan Junction ...	Malvalli.
Lakshmanaiengar ...	Hassan West ...	Hassan.
Srinivas Tatachari ...	Shimoga West ...	Shimoga.
Venkatramanaiya ...	Kadur District ...	Kadur.
Tirumalachari ...	Shimoga-Chitaldroog Junction	Chitaldroog.
Khwaja Muhammad ...	Hindustani Schools ...	Bangalore.
Appalachari ...	Nundydroog Training School...	Devanhalli.
Venkat Rao ...	Ashtagram ,, ..	Nanjangúd.
Venkatnarnaiya ...	Nagar ,, ...	Kadur.

14. Tirumalachari and Ramacharlu are both well reported on for their interest in their work and general efficiency. In the First Circle the greatest progress has been apparent under Múrti Rao, newly appointed to the Mysore-Hassan Junction District, which has for long been unsatisfactory. Khwaja Muhammad continues to do his work in a steady and trustworthy manner. He has been promoted to a higher grade. Venkat Rao is reported to be 'the right man in the right place.' Timmappa and Venkatramanaiya have not worked well. As a body, however, the Sub-Deputy Inspectors have rendered effective aid in promoting primary education.

III. GENERAL FINANCIAL STATISTICS.

15. The subjoined statement shews the expenditure for the year on the part of Government, and the proportion borne by State and Local Funds respectively. The increase over last year is entirely under the head of instruction, and is due, in part, to the formation of the Central College, and chiefly, to the establishment of the School of Engineering and Natural Science ; but over Rs. 6,000 of the excess arises from payments out of this year's budget for indents of books ordered from England through the Secretary of State in the previous period ;—

Charges.

Head of Charge.	Expenditure during 1875—76.	
	From State Funds.	From Local Funds.
Direction with its subsidiary charges ...	15,360	...
Inspection with its subsidiary charges ...	19,692	7,366
Instruction (including all educational expenditure not coming under the above heads) ...	1,86,178	77,156
Total.....	2,21,230	84,522

16. By adding the expenditure from other sources, which amounted to Rs. 78,769 in aided schools, and Rs. 38,293 in unaided schools, we arrive at a total of Rs. 4,22,814 expended on education during the year from both public and private funds.

17. The receipts from all sources, paid into Government Treasuries, amounted to Rs. 1,31,387; composed of school fees Rs. 18,553, proceeds of book sales Rs. 18,808, and educational share of local fund collections Rs. 94,026. The school fees show an increase of Rs. 4,000, but this will probably be much larger in the ensuing year, for although a higher scale has been adopted, the sanction for its introduction was not received at the commencement of the year, and after receipt it was necessary to give notice for a certain period before levying the new rates. From book sales also there has been an increase. On the other hand, the local fund collections come to Rs. 2,780 less than last year.

Receipts.

18. The receipts in aided schools are returned at Rs. 82,023, of which the sum of Rs. 31,724 is set down as derived from fees. The latter is such an advance upon last year that, in the statements furnished by managers, other fees have probably been mixed up with those paid for schooling. The income from unaided schools is given as Rs. 38,293, of which Rs. 38,113 was from fees. This shews a marked decline. Adding together all items, we obtain an aggregate of Rs. 2,51,703 as the sum of the receipts from all schools of every description in the Province. Of this Rs. 88,390 or 35 per cent represents the fees paid by pupils.

19. Regarding the returns from fees, the Government of India, in the notice, just received, of the report for last year, point out the appa-

rent discrepancy between the amount stated as realized from each description of school. 'The figures' it is observed, 'are remarkable, and imply that the less that is known of each class of schools the larger the alleged income from fees.' On this subject I beg to afford the following explanation, making use of the figures in the present report.

20. The fee returns are as given in the margin. But though the amount under each head, thus stated in the aggregate, increases as it recedes from Government connection, it may easily be shewn that relatively to the number of schools and of pupils the figures exhibit a very different result.

Government Schools	Rs.	18,553
Aided	,, ,,	31,324
Unaided	,, ,,	38,113

21. The statement, in the form required for comparison, is given below. It must be premised that Hobli schools, being supported by the payments levied for the local fund cess, pay no fees. These, therefore, have been removed from the calculation, together with Normal schools and convicts in jail, who also pay no fees. On the other hand, from aided schools have been deducted 4 schools for European children, the fees in which are so much higher than any we have, as, for purposes of comparison, to render the figures altogether misleading. The schools I allude to,—Bishop Cotton's, Saint Andrew's and the Wesleyan Girls' School—contribute, between them, Rs. 16,434 to the total. The figures we have to deal with then are as under :—

	Schools	Pupils.	Fees.	Average Fees.	
				Per School.	Per Pupil.
Government ...	129	8,466	18,553	143—13—1	2— 3— 0
Aided ...	110	8,227	14,890	135— 5—9	1—12—11
Unaided ...	1,350	17,882	38,113	28— 3—8	2— 2— 1

22. It thus appears that each pupil in a Government school pays, on an average, 11 pie more a year than a pupil in an unaided school, and 6 annas 1 pie more than a pupil of an aided school. It might, perhaps, from this be fairly inferred that Government grants are being given to those who can least afford to pay for themselves, which seems a correct principle.

23. An analysis of the expenditure on instruction in the various grades of Government and aided schools, exhibits the following results :—

Analysis of Expenditure.

Description of Schools.	Government.		Aided.	
	From State Funds.	From Local Funds.	From State Funds.	From other Sources.
College and Collegiate Schools	35,046	...	...	...
Boys' Schools				
Higher	18,54[illegible]	...	11,960	26,724
Middle	26,106	...	10,690	19,607
Lower	19,807	62,729	7,148	11,366
Girls' Schools.				
Higher	...	...	4,040	7,488
Middle	...	...	3,420	3,618
Lower	3,031	...	8,263	8,517
Normal Schools ...	1,027	5,289	...	...
Special ,, .	12,957	...	1,200	1,449
Total...	1,16,515	68,018	46,721	78,769

The ratio which grants-in-aid bore to the whole Government expenditure for instruction was 24·9 per cent.

IV. UNIVERSITY EXAMINATIONS.

24. *Degrees.*—The examinations for degrees are held only in Madras. Six candidates went up from Mysore for the Bachelor of Arts examination ; namely, 4 from the Central College, 1 from the Raja's High School and 1 private student. Of these, two from the Central College were successful ; but did not pass high, being placed in the third class, one 2nd and the other 22nd. The former is Y. Srinivas Rao, the first student in the School of Engineering and Natural Science, and it is creditable to him that he should have found time to prepare for the B. A. examination, as he has steadily maintained the first place in this school from the beginning. In the Matriculation and F. A. examinations he took

a high place in the first class, and would doubtless have distinguished himself more on the present occasion had his attention not been chiefly devoted to a different course of study. The other candidate deserves mention as having passed in Sanskrit as his optional language.

25. *Branch Examinations.*—The First Arts and Matriculation examinations were held as usual at Bangalore, when 33 appeared for the former, and 197 for the latter. The results are shewn below.

26. *First Arts Examination.*—The candidates consisted of 23 students from Government schools and 4 from aided schools, of whom 9 of the former and 3 of the latter passed, as per particulars at foot. Of those who succeeded, 8 were Hindus, 1 a Eurasian and 3 Europeans. H. F. Staunton, son of a former official of this Department, headed the list from Mysore, being placed 8th in the first class.

First Examination in Arts.	No. of Candidates.			
Schools.	Presented.	Passed.		
		First Class.	Second Class.	Total.
Government—				
Central College ...	15	...	6	6
Raja's High School ..	4	...	2	2
Shimoga High School ...	4	...	1	1
Aided—				
Bishop Cotton's ...	4	1	2	3
	27	1	11	12

27. *Matriculation.*—Of the candidates for Matriculation, 69 came from Government schools, 40 from aided schools, and 22 were private students. Of the first, 21 passed; of the second, 27; but none of the private students. There were also 2 successful candidates from the Royal School, Mysore, in which His Highness the Maharaja is being educated; and 2 former students of Mysore schools passed from the Presidency College, Madras. Of the 52 who thus matriculated, 40 were Hindus, 1 was a Native Christian, and 11 were Europeans or Eurasians. The following were the schools represented:—

Matriculation Examination.	No. of Candidates.			
Schools.	Presented.	Passed.		
		First Class.	Second Class.	Total.
Government—				
Central College	25	...	7	7
Raja's High School ...	18	...	6	6
Shimoga Do ...	*11	...	4	4
Hassan District School ...	14	...	2	2
Chikmagalur Do ...	4	...	2	2
Aided—				
Bishop Cotton's ...	*11	1	5	6
Saint Andrew's ...	* 8	...	5	5
Wesleyan Mission Institution ...	*24	...	5	5
London Mission do ...	8	...	8	8
Wesleyan Mission School, Mysore	8	1	2	3
Royal School ...	2	...	2	2
Total.....	133	2	48	50

28. It is evident that a sufficient control is not exercised over the number permitted to appear for examination. That there is some difficulty in doing so I am aware, for the examination is open, and no doubt rightly so, to any one who sends in an application and pays the appointed fee. But it is a bad feature that boys should be placed in a dilemma that impels them to try their chance contrary to the deliberate advice of their masters, who can have no inducement to keep back pupils that are ready for the test. The only mode in which this evil can be effectually checked is not to admit boys prematurely into the class preparing for matriculation. To err in strictness at this point is in every way preferable to a subsequent rejection, by weeding out, of those who once admitted have excited within them hopes it is not in the nature of boys can be repressed. And it is doubtful whether subsequent failure has the salutary effect of subduing these feelings, especially among natives, who, I have observed, are seldom disposed to acquiesce in the estimate that

* The following went up without the approval of the Head of their school:—
3 from Shimoga, 5 from Bishop Cotton's, 2 from Saint Andrew's, 12 from the Wesleyan Institution.

might naturally be formed of their competence from their ill success. They rather charge their 'pluck,' as they call it, upon 'misfortune.' I have even received an application for employment from a candidate who had *failed*, in which he stated that he had successfully passed the Matriculation examination, but owing to his misfortune had not obtained the required number of marks!

V. GOVERNMENT INSTITUTIONS.

29. In the following table are entered the usual particulars regarding the different grades of Government educational institutions in Mysore :—

Description of Institutions.	Number of Institutions.	Number on the Rolls (monthly average.)	Average Daily Attendance.	Total Expenditure.		Total Amount returned to Government.	
				From Provincial Funds.	From Local Funds.	From Fees.	From Book Sales.
College and Collegiate Schools..	3	1,032	913	35,046	...	9,366	12,772
Boys' Schools.—

A. College and Collegiate Schools.

30. The arrangements referred to in last year's report for defining the position and work of the higher Anglo-vernacular institutions were, as far as possible, brought into operation during the year, under Chief Commissioner's orders of 28th June and 30th November 1875. The object aimed at in the formation of the Central College was to concentrate the higher instruction preparatory for the taking of degrees into one institution for the Province. To act as feeders to this, a High School, teaching up to the standard of the First-in-Arts examination, was affilia-

ted in each Division. In the Bangalore High School and the Raja's School at Mysore such institutions existed, but in the Nagar Division there was none. The Shimoga District School was therefore provided with a stronger staff of teachers, and formed into a High School. A system of scholarships was drawn up, connecting the various schools with those of a higher grade, and finally with the College, so as to lead on students who entered upon University studies to complete the course.

31. The staff of the Central College it was resolved, at starting, to strengthen by the appointment of a Vice Principal from England, specially qualified to act as Professor of Physical Science; and the Secretary of State's nomination to this office is awaited. Provision was also made for a Tamil Munshi, and the same will be required for Sanskrit; but for the present the Pandit for Kanarese is competent to instruct in Sanskrit too. Other arrangements are contemplated for eventually providing courses of lectures on such subjects as Moral and Natural Philosophy and Political Economy, open not only to students but to the outside public. These measures cannot conveniently be perfected till the premises, now undergoing enlargement, are ready, and the professorial staff is made up.

32. As regards the proper School departments, they will be formed into an Upper and a Lower School, composed each of three classes. In the Lower School, instruction in English will be conveyed more generally through the medium of the vernacular. For this purpose a work of Graduated Translation Exercises in Canarese and English has been introduced; and the use of an edition in Hindustani and English is intended, for the benefit of Muhammadan boys; with special Hindustani tutors. This will remove a hindrance which, it is alleged, now keeps away Muhammadan boys from our English schools; namely, that there is no one to explain to them in their own language the elementary lessons in English, and thus enable them to get such a mastery of it that they can enter on the more advanced course with ability to profit by instruction conveyed in English alone.

33. The studies of the Upper School will be such as lead up to Matriculation. I had proposed a Leaving Examination instead, something like the *Arbiturienten Examen* of the Germans, for such pupils as wished to terminate their studies at this point and had no intention of following up the University course; but this has not been adopted, and

no doubt there would be difficulties in working it. The grounds for my proposal were thus stated (September 1874). At present all the boys in the Anglo-vernacular schools have Matriculation set before them as a goal to be reached. But this is not in itself an examination that can be treated as final. It is but the first step in a University course, which, to be of any lasting benefit, needs to be followed up until that course is completed. But the time and expense attendant on pursuing such a course are often practically, and perhaps in the interests of real education should still more be, a bar to all but the favored few, such as have the means to afford it, or the talents to win scholarships that will carry them through. And yet boys require a definite aim in their studies, just as those from whom they subsequently seek employment require some certificate of qualification on which they can rely.

34. The completion of the Lower School course, as above described, will be certified after examination by an Inspector; and such a certificate will be required before obtaining admission to the Upper School. In connection with these measures, the adoption of suitable and improved school books is receiving attention. I trust that in a couple of years the system may be in full and satisfactory operation, and be productive of beneficial results in this important department of our educational work generally. Another question,—that of school hours,—has at the same time been under consideration. Many advantages would, in my opinion, accrue from a change of the present hours; but an effort I made in this direction some years ago was overruled. The matter is now engaging the attention of thoughtful natives, and it seems not unlikely that the objections urged against a change, at all events in some quarters, will be withdrawn.

Central College and High School, Bangalore.

35. The numbers under instruction in this institution at the end of the year are 524, with an average daily attendance of 457, against 574 and 481 respectively last year. The decrease is no doubt partly due to temporary inconveniences mentioned below. The students include 498 Hindus, 8 Muhammadans and 18 others, of whom 8 are Europeans or Eurasians and 10 Natives. The return from fees is Rs. 5,453, which is a slight increase on the amount obtained last year.

36. Out of 4 who appeared for the B. A. examination, 2 graduated; 6 passed the F. A. examination, out of 15 sent up; and 7 matriculated

out of 21. Two others appeared privately for the F. A, and 15 for Matriculation, but failed. The annual examination was held as usual the latter part of the year, the college classes being examined as far as possible by gentlemen unconnected with the College, and the Lower School by the senior masters.

37. Mr. Waters received promotion to the Principalship of the Central College in July. Mr. Leonard, who has always proved a very efficient assistant, was at the same time promoted to the Head Mastership of the Shimoga High School, his place being taken by Mr. Taylor from that station. Mr. Subbaiya, the fourth assistant, was similarly transferred to the charge of the District School, Chikmagalur, his place being taken by Srinivas Rao, who has just graduated. No further changes were contemplated, when an unexpected vacancy at Mysore threw out our arrangements. It thus became necessary to send Mr. King to Hassan, though to avoid weakening the staff here I had proposed to supply the place in a different way. Mr. Hanumanta Rao, however, the best teacher at Mysore, was transferred to Bangalore and fully made up the deficiency. But Mr. Taylor now fell ill and was forced to leave for a time. These changes, which have been unavoidable, together with the operations of the Public Works Department in pulling down parts of the building for enlargements, have certainly been detrimental to steady progress. But, as stated above, they are inconveniences of a temporary nature, which will be surmounted before long. As a measure of relief, the lowest classes have been accommodated in a separate building in the Pete.

38. The College classes are thus composed ; the senior B. A. contains 3 students, junior B. A. 7, senior F. A. 18, junior F. A. 15, with Matriculation 25.

39. Y. Srinivas Rao, who held the Dobbs' scholarship for 4 years, having graduated, the scholarship was given to Arumugam Modaliar, who matriculated last year. The holders of scholarships, 21 in number, some of whom as pupil teachers take turns in giving lessons to a class, are reported to have conducted themselves well and to have done fairly in the University examinations. Chengappa, the Coorg mentioned in last report as having gone to England, is now at Cambridge studying law. Of the medals offered by Mr. Srinivasaiengar, Assistant Commissioner, Hassan, in honor of the expected visit of His Royal Highness the Prince

of Wales, the gold medal for Sanskrit was gained by S. Srinivas Rao of this College.

40. A reading room has been established in the school by the senior students, supported by a small rate of subscription among themselves. Several newspapers and magazines are taken, and other literature has been lent for the use of the members. Lectures and debates may probably be started by and bye.

41. The United Schools Athletic Sports were more popular than ever. The challenge cup was won by the Muhammadan boy who gained it last year, and is therefore still held by the Central College. Mrs. Elmhirst very kindly consented to give away the prizes.

Raja's High School, Mysore.

42. This school, which has also undergone several changes during the year, shews an attendance at the close of 350, with a daily average of 271; against 250 and 220, the figures for last year. A material increase has thus taken place. There are 328 Hindus, 14 Muhammadans and 8 Eurasians. The fees have produced Rs. 2,553 against Rs. 2,205.

43. At the University examinations, 2 passed the First Arts examination, out of 4 candidates; and 6 matriculated, out of 18. The Inspector reports that, although the teaching staff is weak, the school is doing its work all things considered remarkably well. The changes which have occurred, and the distress in the town occasioned by drought and cholera, have told upon the work generally; and closer supervision than has been possible is needed for the lower classes. Arrangements for supplying some of the wants pointed out have already been made, and further steps will be taken to make up an efficient staff. The accommodation has been greatly increased by the removal to separate premises of the vernacular branches.

44. Mr. J. Dunning was in charge of the school till the middle of May, when he retired on a well-earned pension. He had been at the head of the institution for 12½ years, first as directly subordinate to the late Maharaja, and on His Highness' demise, as an officer of this Department. His devoted labors resulted in raising the school from a weak and disorganized condition to rank as the second in the Province. For these

services he received the designation of Principal, and before his retirement had been appointed to act for a period as Inspector of Schools. It is only doing him justice to say that he won the respect of his pupils and the esteem of all who were brought into contact with him; and ever proved a faithful and painstaking public servant.

45. Mr. Pope, acting as Deputy Inspector, succeeded; and during a brief tenure managed the school with energy and ability. The tempting offer of a better paid appointment at Baroda, took him away at a day's notice in the beginning of October. He carries with him the good wishes of the Department, with which he was connected just two years and a half.

46. Mr. Haldwell from Hassan was placed in charge, pending other arrangements. One gentleman who accepted the appointment withdrew, but by the close of the year the services had been engaged of Mr. C. H. Candy, a graduate of Cambridge, acting Vice Principal of the Elphinstone High School, Bombay. Provision had also been made for a good assistant to the Principal, and Mr. King who was appointed being transferred to Bangalore, Mr. Hanumanta Rao, a distinguished student and graduate of the Cumbaconum College, was engaged. He also, as previously stated, was brought into Bangalore before the end of the year.

Shimoga High School.

47. The number of students, 212, is the same as last year, but the fees have yielded Rs. 1,358 against Rs. 688 in the former period. Considering that the school was for a time broken up by cholera, and that the scale of fees has been much raised, the maintenance of the former attendance is a good sign. One student passed the First Arts examination, out of 4; and 4 matriculated, out of 8 sent up. Three more went up for examination on their own responsibilty, without success. At the inspection, all subjects were done well, except Canarese in one or two classes.

48. Mr. Leonard took charge as Head Master in July; Mr. W. Dunning from Mysore was at the same time appointed as his assistant. A Canarese Munshi was also added to the staff. It is intended to enlarge and improve the premises as soon as arrangements can be made.

49. The necessity for a High School here was impressed upon me on visiting the District and becoming acquainted with the difficulties which lay in the way of students coming, at an early age, from that distance to Bangalore for instruction. There was, however, at the time no provision for such an institution for the Nagar Division, and I could not foresee that the opportunity would so soon present itself of making proposals for the establishment of one. I could therefore do no more than recommend the deputation who addressed me on the subject, to take advantage, as far as possible, of the schools at Bangalore. Their wishes have now been gratified by the establishment of a High School in their midst, and I hope it will prove a benefit to that remote and interesting part of the Province.

B. Schools of the Higher Class.

50. *District Schools.*—There are five classed under this head, and the table in the margin shews the attendance at each, as well as that of the vernacular branches attached. The total number has decreased very slightly, which, in connection with the higher scale of fees introduced, must be interpreted as a favorable sign.

Schools.	Pupils in each branch.		
	English	Kanarese.	Hindustani.
Hassan ...	187	55	...
Chitaldroog ..	111	95	28
Túmkúr ..	138	89	58
Kolar ..	60	43	62
Chikmagalur ...	115	20	56

51. *Hassan.*—Mr. Haldwell, long well known as the Head Master of this school, was temporarily transferred in October to Mysore, to take charge of the Raja's High School. Mr. King from the Central College took his place, and conducted the Hassan School for the rest of the year. It was inspected shortly before his arrival. The Inspector reports that every day of the examination week 180 pupils were present, and that the school continued to maintain its high character for efficiency. Two of the senior students matriculated, but a good many in the class are hindered by official employment from giving sufficient time to preparation. The second class was well taught, and the junior classes generally, the principal defect pointed out being the want of exercises in reciprocal translation, for which a book is now ready. The good order and discipline of the school are particularly noted, and the readiness of the assistant masters in carrying out orders. An extension of the building has provided room that was much needed.

52. *Chitaldroog.*—Mr. Coleman had charge of the school the whole year. The fall of 20 in the number of students is due to the removal from the roll of those who were irregular in attendance or in payment of fees. The results of the inspection, held in September, were on the whole favorable. There was a very noticeable improvement in mathematics, in which subject the majority of the pupils in the senior class failed badly the year before. The general tone and discipline appeared to the Inspector very good. There was no noise or confusion or disorder anywhere. It was evident that the school was in the hands of a master who understood and felt an interest in his work.

53. *Túmkúr.*—Mr. Clapham was at the head of this school throughout the year. He may be congratulated on being appointed Canarese Examiner for the University examinations. The attendance at the school, at the end of the year, is the same as stated in last report. The fees have been collected with great regularity and exactness. An additional assistant is required and has been provided for. The senior class was found at the inspection to be weak in mathematics, and the teaching of certain subjects in the lower classes was defective. These matters will doubtless be remedied before another inspection.

54. *Kolar.*—The condition of this school is far below what is expected of a District school. The attendance has fallen considerably, and teaching in several of the classes is unsatisfactory. Some changes appear desirable among the staff of masters, and the necessity for greater exertion has been impressed upon Mr. Birch, the Head Master.

55. *Chikmagalur.*—On the transfer to the Deputy Inspector's office of Mr. Venkatpataiengar, under whom the school had made so great an advance, as reported last year, Mr. Subbaiya, B. A. of the Central College, was appointed to act as Head Master, and took charge in July. At the same time two additional assistants were appointed. The increased attendance, nearly treble what it was before, has thus been maintained, and I have reason to know that the school is giving much satisfaction to the native community of the place. But, unfortunately, a severe outbreak of cholera has checked its progress for the time being. Two students from this school matriculated The building has been repaired by the Public Works Department and is now in good order. The play ground will be levelled and fenced shortly.

C. Schools of the Middle Class.

1. *Anglo-Vernacular Schools.*

56. Of these schools, the greatest progress during the year has been made at Channapatna. The attendance has very much increased, and the standard of the school raised. The Head Master has been entrusted with the duties of Sub-Registrar, without prejudice to his appointment in the Educational Department, an experiment which has I believe been perfectly successful, and one which I hope will be tried at other stations as an encouragement to the school masters.

Schools.	Pupils.
Chikballapur ...	90
Channapatna ...	49
Húnsúr ...	34
Hole Narsipur ...	13
Gundlupet ...	27

57. The *Chikballapur* School has kept up its attendance well, and the general progress, to which an active and painstaking staff of assistants have contributed a large share, seems to be steady.

58. The *Húnsúr* School has been provided with commodious new premises, and will I trust shew better results than heretofore. The Inspector is of opinion that its condition might be very greatly improved, with proper exertions on the part of the Head Master.

59. The *Hole Narsipur* School has gone down very much, principally for the reason that no adequate demand exists there for English instruction, as is evident from the very large attendance in the Canarese branch. The school will have to be transferred elsewhere.

60. The *Gundlu* School has suffered from the long continued panic occasioned by the outbreak of cholera in that part. For two months not a boy would attend. The master is entitled to confidence, and will be able to restore the school to its former condition before long. Premises, which have been very much needed, are in course of erection.

61. Applications for English schools of this description have been numerous of late. The policy has for some time been adopted, and I think wisely, of improving and strengthening the staff of the better class of English schools, located at the head-quarters of Districts and a few large towns where an adequate attendance might be reckoned on ; while at the same time inferior and poorly attended schools, where the boys obtained at best little more than a smattering of English, have been given up. I am disposed, however, to think that arrangements might be

beneficially made to meet a certain clearly existing demand for preparatory English instruction in out stations, a demand which is no doubt very limited in each locality, but collectively amounts to a somewhat appreciable quantity.

62. My proposal would be, in the case of Taluk Vernacular schools which have for a considerable period maintained a large attendance and high standard, to open an English class as a reward, provided a specified number of pupils was forthcoming to take advantage of it. The fees should be levied at such rates from each boy, or a sum guaranteed on their account as a body by responsible persons, that the master's salary would be fully covered; the understanding being that the class would be continued as long as this condition was maintained. Government, in short, would provide the masters and inspect the classes, but the expenses would be borne entirely by those wishing to learn English. Were the number to fall so low that the fees no longer repaid the expenditure, the class would be closed. I believe a scheme of this kind might be eagerly accepted in many places, and gratify desires which we have not now the means of responding to.

2. *Taluk Vernacular Schools.*

63. The number of these schools has been increased by one, owing to the transfer of the Shrinivaspur Hindustani school from the list of aided schools. The total attendance of pupils has increased from 2,925 to 3,213, the advance being greatest in the Bangalore District, where there are 95 more pupils than last year. In Hassan, Kolar and Túmkúr, there are about 50 more each. The only District where there has been a decline is Chitaldroog, where the number is less by 40. The time has perhaps arrived when the all round fee of one anna in these schools might be raised in the higher classes.

District.	Schools.	Pupils.	Average.
Bangalore ...	7	583	93
Kolar ...	4	205	51
Túmkúr ...	5	489	98
Mysore ...	7	623	89
Hassan ...	3	236	78
Shimoga ...	7	558	80
Kadur ...	2	175	87
Chitaldroog ...	4	344	86

64. *Bangalore District.*—The largest attendance is at Dodballapur and Nelamangala, which have 140 boys each. They are both very good schools. But Kankanhalli is perhaps the best as regards instruction,

Closepet has made good progress during the year and also stands high. Magadi and Yelahanka are generally satisfactory. The attendance at Sarjapur is below what it should be, and the school is not well reported on. Commodious premises have been purchased at Closepet, and a building which was very greatly needed is in course of erection at Kankanhalli. It is a singular fact that with so many schools in Bangalore itself, I have received a petition very numerously signed by inhabitants of the Pete, requesting the establishment there of a Government Kanarese school. An attendance of between 200 and 300 is promised.

65. *Kolar District.*—The only Kanarese school in this District classed as middle is at Sidlagatta. The other three are Hindustani schools. Among the whole number the Kolar Hindustani school continues to hold a high position. The Sidlagatta Kanarese school has also been doing well. The Chikballapur and Shrinivaspur schools have much ground to make up in order to keep in this class. A school building is under erection at Sidlagatta where one has long been wanted.

66. *Túmkúr District.*—The Koratagere school is pronounced to be, as regards both attendance and progress, the best school of its class in the Second Circle. It contains 123 boys. Sira has nearly as many, and bids fair to rival Koratagere in efficiency. Maddagiri has also a large roll of 120, but its condition is not so satisfactory as that of either of the foregoing. Chiknayakanhalli school is a good one and the Túmkúr school is also doing well. The Koratagere and Túmkúr schools are much cramped for room. Premises will be erected at the former station during the ensuing year.

67. *Mysore District.*—The six Kanarese schools are all very satisfactory. The Mysore School has over 200 pupils, and still keeps well ahead of all our vernacular schools. It being no longer possible to accommodate it in the premises of the Raja's High School, a separate building has been rented for its use, and there is reason to expect that the move will be attended by a large accession of pupils and more complete efficiency in every class. The Seringapatam, Yedatore, Malvalli and Chamrajnagar schools are most favorable specimens of well managed taluk schools. They are all subjected to great inconvenience for want of suitable premises, which if provided, the attendance would doubtless run up to double,

At Chamrajnagar a purchase of large premises has been effected, and arrangements are in progress for building at Seringapatam. The wants of the other two will be provided for as soon as possible. The Nanjangúd school, ranked here, is making steady progress. The Mysore Hindustani school on the other hand, which ought to be the best in the Department, has been in a very unsatisfactory condition, the blame of which must certainly be charged to a great extent on the master. Recently it has been established as a separate branch in commodious premises of its own situated in the Body Guard Lines, and I look to see a reformation effected in its state during this year with a great increase of its numbers.

68. *Hassan District.*—The Hole Narsipur school, with 111 pupils, is doing thoroughly good work, and has recovered much of its former popularity. The Belur school is also a good one. The Hassan school is fair.

69. *Shimoga District.*—The Hole Honnur school, formerly the best in the Second Circle, has not kept up its position under a change of masters. But cholera has interfered to some extent with its progress. The Shimoga and Nyamti schools are well attended, with over 100 pupils each. These, and the Ságar and Channagiri schools, have made advance during the year. Arrangements have been entered into for purchasing suitable premises at the last named place. At Nyamti, also, a police tannah opposite the school building was obtained for the purpose of converting it into a branch for the lowest classes. The Shikarpur and Nagar schools are not satisfactory. This is attributed, in the case of the first, to the distance of the school house from the town, which prevents regular attendance. Proposals have therefore been made for disposing of the present building for a Munsiff's Court, and erecting another in a site more convenient for the boys.

70. *Kadur District.*—The Tarikere and Yedehalli schools, the former with 100, and the latter with 75 pupils, are both in a satisfactory condition. The new premises at Tarikere have been occupied by the upper classes, the lower classes being accommodated in the old building. The Yedehalli school is stated to be one of the best in the northern districts.

71. *Chitaldroog District.*—The failure of the north-east monsoon led to great distress and scarcity in many parts of this District, which told unfavorably on the attendance at the schools. Hosdurga and

Pavugada schools appear to have suffered most. They are both, however, well conducted and prosperous institutions. The former has literally no building to occupy, the old place having tumbled in. Premises are now in course of erection ; meanwhile, the boys sit in the verandah and on the steps of a temple. The Davangere school might be one of our largest Taluk schools, and bid fair during the year to recover its position. But many fluctuations have occurred, and the new master has failed to secure popularity. The Harihar school is in very fair condition.

D. Schools of the Lower Class.

1. *Taluk Schools.*

72. The number comprised under this head is 43 Kanarese, 7 Telugu and 17 Hindustani schools. They are located as per statement in the margin, which also gives the total of pupils in each District. Three Kanarese schools of this grade, namely, those

District.	Schools.			Pupils.	Average.
	Kanarese.	Telugu.	Hindustani.		
Bangalore ...	4	1	4	384	43
Kolar	10	6	2	773	43

Hassan... ...	6	...	1	259	37
Shimoga ...	3	...	2	248	49
Kadur	6	...	2	461	57
Chitaldroog ...	5	...	1	331	55

at Huliyurdurga, Alur and Molkalmuru were given up, owing to the abolition of the taluks and their consequent reduced attendance, Hobli schools being substituted. Three Hindustani schools were newly established, namely, at Kankanhalli, Tarikere and Shikarpur. There has been an increase of attendance in five Districts, the greatest being in Kadur, which shews an advance of 111 pupils over last year. In Hassan the increase has been 68. In Túmkúr and Mysore there is a decrease. The aggregate of all the Districts shews an addition of 187.

73. *Canarese Schools.*—Those at Turuvekere, Devanhalli, Hiriyur and Arkalgúd seem to have made the greatest advance during the year. The first two are reported to be generally satisfactory. Channapatna school has suffered by the unfortunate death of its master, who had made great exertions to improve it. Gudibanda school is marked fair, and some progress has also been made at Nuggihalli, and one or two others. But owing to various drawbacks, either in the places themselves from unhealthiness or small population, or from indifference and negligence on the part of the masters, the majority of the rest give little cause for satisfaction. This state of things calls for close attention from the Inspectors, wherever the fault lies within their power to remedy.

74. *Telugu Schools.*—The Kolar school is the only one marked good. The Gudibanda and Mulbagal schools are reported to be fair. The others all stand in need of improvement.

75. *Hindustani Schools.*—The Kolar school continues the best; the Mulbagal, Shimoga and Malvalli schools are also very good. Those at Sidlaghatta, Dodballapur, and Sarjapur are doing fairly well. I regret to find that the excellent school at Chikmagalur has declined so considerably. This is a poor return for the concessions granted to the Muhammadans of the place as regards the new school building, that it should be erected near the masjid. They have contributed towards the expense of the building themselves, and should be able to guarantee a continuance of the former good attendance. The new schools opened during the past year need further trial.

1,700	0—10—9	2,198	769	13	2,980

2. *Hobli Schools.*

76. The number of Hobli schools, at the close of the year, was 592, with an attendance of 18,068 pupils, against 562 last year, with 15,035 pupils. There have thus been 30 new schools established, chiefly in the Nagar Division, and the attendance increased by 3,033, or at the rate of 21·7 per cent. This annual steady advance is the best indication that could be afforded of the continued popularity of the schools of this description. More will be opened during the ensuing year, but it is impossible to meet half the applications that are being almost daily received.

77. The distribution of schools and other particulars are exhibited in the annexed statement. It will be seen, by comparison with the similar statistics for last year, that the average number of pupils to each school has risen in every District, especially in Chitaldroog, Túmkúr, Bangalore and Shimoga. The average strength of each school, taking all together, has

District.	Schools.	Pupils.	Average.
Bangalore ...	87	2,909	33
Kolar ...	95	2,515	26½
Túmkúr ...	64	2,169	34
Mysore ...	91	2,687	29½
Hassan ...	78	1,992	25½
Shimoga ...	69	2,263	32⅝
Kadur ...	49	1,361	27¾
Chitaldroog ...	59	2,172	36½

thus advanced from 27 pupils to over 30. With this result may usefully be compared the average number of pupils in each indigenous school, namely 13.

78. Of the children under instruction in Hobli schools, 17,921 are boys and 147 girls. According to creed, 17,042 are Hindus, 982 Muhammadans, and 44 others. All, except 92 in Kolar District and 53 in Chitaldroog District, are learning Canarese; those learn Telugu.

79. The largest school is the new one opened lately at Vadagenhalli, an important place of trade in the Devanhalli taluk. It contains 149 pupils, of whom 7 are girls. The merchants appear to take much interest in its progress, and have provided large and commodious premises for the accommodation of the school.

80. The Melkote school, with 136 pupils, comes next. In point of efficiency and attainments, it probably stands higher than any other. It is also characterized by certain unique features of great interest. The principal is the large attendance of girls. The number having risen to 31, separate premises were assigned for their instruction. We were also fortunate in obtaining the service of a well educated young Brahmani widow as an assistant teacher for the girls' school, one valuable result of which has been that several young married women have placed themselves under her instruction, on the condition that their names are not entered in the roll and that they will not be required to appear at the public examinations of the school. It is very gratifying to note this beginning of zenana work. Regarding the Hobli school at Melkote, which is well known as a sacred place of the Sri Vaishnava Brahmans, it should be stated that the boys who attend are nearly all Sudras, and not Brahmans. The latter resort to the large grant-in-aid-school in the same place.

81. The next largest school is that of Tyamagondal, where there are 105 pupils. It has kept up this high attendance for several years. The standard of instruction, however, is not quite so good as could be wished for. Still, it is a successful and popular school. The only drawback is want of premises. These the merchants of the place have more than once professed their readiness to erect, but nothing has been done.

82. The schools at Ramasamudra, Kubattur, Kalale, Dommasandra and Harohalli, have between 70 and 80 pupils each. Those of

Lakkur, Masti, Korlapur, Sante Bachalli, Siddavvanhalli, Male Bennur, Bommagondankere, Mattod, Sante Bennur, Honnali, Bellavi, Hirod, Periyapatna, Sulibele, Bidadi and Dodbele, all have over 60 pupils. Besides these, there are 36 schools with an attendance of over 50 pupils in each. These statements are evidence that the schools are being appreciated. I may here also mention, as an indirect testimony to their growth, the remark made to me lately by a Deputy Commissioner, that, on sanitary grounds, he thought some check should be imposed on the increase of attendance in the Hobli schools.

83. Efforts are being made to secure proper accommodation by holding out every encouragement to the villagers to come forward and erect premises. The cost of timber being alleged as the chief difficulty, a grant is made of half the expense. As a further inducement, a supply of desks, benches and other furniture, which all the schools are very ambitious to acquire, has been promised for any village in which suitable premises, with a specified extent of accommodation and provided with properly secured door and windows, are built for the use of the school. Many are now in consequence well located in buildings erected either by some wealthy man at his own expense as a work of charity, or by subscription among the inhabitants. In some cases, an old house has been put into repair and handed over, and in others, suitable houses have been purchased by the villagers for the purpose. New schools are never established now in any place where the people have not previously got premises ready.

84. As regards the condition and progress of the schools, the Inspectors report 47 to be *very good*, 162 to be *good* and 246 *fair*: the rest are not satisfactory. There are (deducting one District the returns from which do not contain the information) 25 schools with a first class as the highest, 231 whose highest class is a second, 222 in which the highest is the third. It thus appears that 246 of the schools, or more than two-fifths, have advanced beyond the elementary stage: that 76·8 per cent are doing generally well, 35 per cent very well.

85. The school panchayats, or committees, composed of a few respectable men of local influence, have not, as yet, generally, done much towards promoting regularity and progress. It unfortunately happens that many villages are broken up into two parties, each pledged to oppose

any step proposed or taken by the other. In such cases it requires much care to preserve for the school a neutral position.

86. For the benefit of Muhammadan boys, branch schools, giving instruction in Hindustani, have been established in connection with some Hobli schools where there was sufficient ground ; and more will be done to meet such local wants in the ensuing year. It is also intended to give a practical turn, as far as possible, to the studies. For this purpose, arrangements have been entered into for obtaining a Canarese translation of Dr. Dhanakoti Raju's excellent little manual on Hygiene. The agricultural class book will also be revised, and made suitable for introduction into village schools ; an object which was not kept in view in its preparation at first. In order to excite a taste for reading, a Canarese newspaper is circulated to the best schools.

E. Female Schools.

87. There has been no change in the number or strength of girls' schools, but the increased attendance reported last year has been maintained. The pupils include 340 Hindus and 6 Muhammadans. The girls at Chintamani, 26 in number, learn Telugu. All the others are studying Canarese.

District.	Schools.	Pupils.
Bangalore ...	4	160
Kolar ...	4	133
Hassan ...	1	47

88. The Shrinivaspur school, so long unsatisfactory, seems to have made the most progress this year, the credit of which is due to the master's son, whom he has called in to assist him. The condition of most of the others is fair, making allowance for the various difficulties that have to be encountered with this class of schools. But those at Chintamani and Sarjapur are badly reported on. The Wesleyan missionary at Hassan has offered to take over the school at that station, on the footing of a grant-in-aid school, an arrangement which will probably be found beneficial.

89. Regarding the influence which these schools are exerting, the remarks made in previous reports continue to hold good. Opposition to girls' schools is now seldom raised, but the people are not prepared to take any very active part in promoting them, nor willing, generally, to incur any expense in connection with the education of their girls. But I am assured, on competent authority, that many of the girls married to educated husbands are, by the help of the little they have learnt in our schools,—and little it must be as long as they are compelled to leave school at the early age which custom now requires,—continuing their studies in private, and making substantial progress. And that it is very pleasant to observe the increasing intelligence of these.

90. We are not therefore open to the reproach of promoting unisexual education. The blame rests with the people themselves, with whom it lies to take advantage more earnestly and liberally of the means for female education, regarding it as an element in national progress. The number of girls attending Hobli schools has already been referred to. Also the interesting movement in connection with the Melkote school. During the ensuing year a beginning will probably be made at some other places from which applications have been received.

F. Normal Schools.

Hindustani Normal School, Bangalore.

91. There are 14 students under instruction at the end of the year, of whom 5 are in receipt of stipends. Certificates of qualification as masters were granted to two students after the usual examination. I regret that I cannot regard this school as at all satisfactory. It is not methodically conducted and there is evidently much irregularity in the attendance of the students. The Head Master is a man of ability, but too anxious to impart general instruction, without regard to the special objects to which the training of the school should be directed.

Training Schools for Hobli Masters.

92. Three have been in operation during the year, one for each Division. The Nundydroog school was located at Devanhalli, the Ashtagram school at Nanjangúd and the Nagar school at Kadur. Besides fresh candidates for training, such masters already in employ as seemed deficient in knowledge have been sent back for a further period of study; a measure which will bear fruit in the increased efficiency of schools now kept at a low standard through the inability of the masters to teach up to a higher grade. At the same time it may be stated that the men now enjoy a longer course of training than under the circumstances was possible when the Hobli schools were first started, and that the standard qualifying for a certificate is proportionately higher than it was formerly. The men are also carefully selected and examined before admission, preference being given to indigenous masters of the country in whose family the calling has become hereditary.

93. *Devanhalli.*—The number of students was 25, of whom 19 obtained certificates of qualification at the final examination. The school seems to have been fairly conducted, but the material was not promising

as the men were mostly unsuccessful candidates of the previous year. Applications for admission are unceasing, and there is no reasonable limit to the number of candidates that might be obtained if we were in a position to receive more.

94. *Nanjangúd.*—At the examination held in March, 27 students were passed out with certificates. The Inspector reports that 'They all possess a fair grammatical knowledge of Canarese. In arithmetic a large proportion obtained half marks and upwards. The geography of India is pretty well known, and the outlines of general geography tolerably well. Lessons on teaching have received attention. The general progress has been decidedly good.' The men were appointed to schools temporarily in charge of acting masters, who were all called in to the training school. These with other admissions have raised the number of students at the end of the year to 41.

95. *Kadur.*—This school had when examined 48 students in attendance, of whom 19 are masters. Two men died of cholera and a general panic ensued which broke up the school for some time. From these and other causes, the examination was only a preliminary one, and no certificates were granted. During the ensuing year the school will probably turn out a good number of trained men. Much pains have been taken to secure candidates from the Malnad districts.

G. Other Schools for Special Education.

School of Engineering and Natural Science.

96. This important institution, the objects of which were fully described in last year's report, was opened on the 1st of May; with Mr. Gramatzki, now Executive Engineer, 4th Grade, as Principal, and Mr. Subba Rayar, B. A., B. C. E., as Assistant. The course of study is contained in the appendix to this report. The principal change in the original arrangements has been an increase of the rates of scholarship proposed for the Lower Department. These are now fixed at Rs. 12 the first year, and Rs. 18 the second, for the Upper Subordinates' class; Rs. 8 the first year, and Rs. 12 the second, for the Lower Subordinates' class.

97. The Chief Commissioner nominated, as provided for in the rules, 10 candidates to the Upper Department, and 7 to the Upper Subordinate class of the Lower Department. Of the former, one, a most promising young man, died, and another resigned, leaving 8, who have been under instruction to the end of the year. Of the students in the Lower Department, one left, and 6 therefore remain.

98. The earlier quarterly examinations shewed that the students, though the Upper had passed the First Arts examination, and the Lower the Matriculation, were defective in some essential points, especially in the ability to apply what they had previously learned to practical questions. This was attributed to their having been taught merely with a view to pass examinations. Several of the Upper Department, however, gradually fell into the new system of study, but the Lower Department not so readily. Threats of removal from the school had the effect of stimulating the backward and idle to greater exertion, and the first annual examination exhibited the following results.

99. In the Upper Department, seven out of eight students passed, in the order denoted in the margin, where the total marks obtained by each out of a maximum of 500 are also shewn. The eighth, Abdul Karim, gained only 162 marks altogether, or less than one-third, required for a pass,

1	Srinivasa Rao, B. A.	... 341
2	Govindacharlu	... 315
3	Balakrishna Tivari	... 261
4	Venkatachari	... 231
5	Raghavulu Naidu	... 222
6	Muttanna	... 198
7	Lovery	... 177

and also failed in Algebra. Srinivasa Rao has, throughout the year, kept a decided lead as head of the class, with Govindacharlu as a steady second. Between the next three there is considerable competition, but Balakrishna Tivari seems likely to secure the third place. Muttanna is a Coorg. On the whole, the results of the first year's instruction in this department may be pronounced encouraging.

100. In the Lower Department, the total marks gained, out of a maximum of 430, were as per annexed list. All thus obtained more than one-third marks, but Phaure failed to get the maximum required in trigonometry and mechanics, and Raghavachari failed in the theory of drawing. Nalla Nayagam and Narsimmaiengar have kept the first and second places throughout the year. The others are considerably inferior to these, and their relative positions are uncertain. This department, though not so satisfactory all through the year, is considered to have made improvement latterly.

1	Nalla Nayagam	... 310
2	Narsimmaiengar	... 251
3	Phaure	... 191
4	Krishna Rao	.. 189
5	Anantaramaiengar	... 179
6	Raghavachari	... 172

101. During the ensuing year, the number of students will probably be considerably increased, as the present number is quite inadequate to meet the demand that must always exist for professionally trained Engineers, Surveyors and Foresters.

Medical Students.

102. At the annual examination in August of candidates for admission to the Mysore Subordinate Medical Department, 8 passed and were posted as medical pupils to the following institutions :—

To the Bangalore Dispensary	5
„ Bowring Civil Hospital	3

Jail Schools.

103. The instruction of convicts in jail was continued, on the same system as described in recent previous reports. The number thus taught during the year was 1,062, as per details in the margin. Of those in the Central Jail at Bangalore, 10 are women, and 10 juveniles. The total number is much higher than last year, especially at Shimoga, where it is 2½ times greater. In Bangalore there is an increase of 65.

Jail at—	Convicts under instruction.
Bangalore ...	468
Mysore ...	229
Shimoga ...	365

104. *Central Jail.*—Dr. McGann, Officiating Superintendent, has obliged me with the following remarks on the education given in the Central Jail at Bangalore.

'The progress made in the classes is but slow, as a rule; but, still, the mere attempt to learn the discipline of the school has a very excellent effect.

Of the long-term convicts released during the year, 66 (64 men and 2 women) had learned to read and write in jail. Some of the more intelligent, who have been set to learn English for the employment in the press, or have been permitted to do so for other special reasons, have made wonderfully good progress.'

The Police.

105. As described in last year's report, a number of police constables requiring instruction in reading and writing have attended at such times as their other duties allowed at the Taluk and Hobli schools.

VI. PRIVATE INSTITUTIONS UNDER GOVERNMENT INSPECTION.

106. The usual particulars regarding schools receiving grants-in-aid from Government are contained in the following statement, which shews the number and attendance of pupils, &c., for each grade and description of school:—

Class of Schools.	Number of Institutions.	Number of Pupils on the Rolls, Monthly Average.	Average Daily Attendance.	Grants-in-aid given by Government.	Expenditure from all sources other than Grants-in-aid given by Government.	Fees.

Total.....	114	7,801	6,712	46,721	78,768	31,724

107. *New Grants.*—During the year under review new grants were given as under:—

		Rs.	
Boys' Schools.—Wesleyan School, Shúlé		12	a month.
Do	Cantonment Bazar	8	,,
Do	Broadway	15	,,
Do	Knoxpet	8	,,
Girls' Schools.—36th Regiment Hindu Girls' School		15	,,
Wesleyan Girls' School, Fort, Mysore		20	,,
Mixed School.—Saint Andrew's Poor School		30	,,
Industrial.—Anglo Indian Aid Association		200	,,

108. *Building Grants.*—The above were grants for education. Besides these, the following lump sums were given in aid of school buildings, under the rules provided for that purpose :—

	Rs.
Wesleyan Hindu Girls' School, Gubbi ..	150
,, ,, ,, Fort, Mysore ..	1,500
St. Bartholomew's Girls' School, Mysore ..	873
Sanskrit School, Muttur	100

109. *Grants withdrawn.*—The following grants were withdrawn, for the reasons stated in each case:—

Hindustani School, Hassan.—The master, a native doctor, went away for several months; and, finding a better opening elsewhere, never returned. The school thus ceased to exist.

Hindustani Schools, Ihliyurdurga and Kadnur.—Both schools continued very unsatisfactory for some time, and as due warnings failed to produce any change, the grants were withheld. Arrangements have since been made for better schools at both places.

110. Arranging the Aided Schools, as was approved by the Chief Commissioner last year, according to the language which forms the subject or medium of instruction, we obtain the following results:—

Language.	Boys.'		Girls.'	
	Schools.	Pupils.	Schools.	Pupils.
English	7	506	6	352
Anglo-Vernacular ...	14	1,891	4	332
Canarese	16	1,253	16	1,434
Telugu and Tamil ...	7	562	5	376
Sanskrit	12	474	...	...
Hindustani ...	23	1,152	2	135

111. The distribution of Aided Schools in each District is as given in the table which follows:—

District.	Boys'.		Girls.'	
	Schools.	Pupils.	Schools.	Pupils.
Bangalore	41	3,756	21	1,813
Kolar	9	436	...	...

Mysore	10	671	7	403
Hassan	3	150	...	...
Shimoga	4	164	1	80
Kadur	...	...	...	...
Chitaldroog ...	1	42	1	35

A. Aided Schools of the Higher Class.

112. *English.*—The number of students at Bishop Cotton's shews an increase, the total being 138 against 113 the year before. One or two changes were made among the assistant masters, which appear to have had a beneficial effect on the discipline of the school. The returns from fees thus shew a larger amount. Besides boarders on the foundation, two of the assistants take boarders at their own houses. At the University examinations, 3 passed the First Arts examination, one in the first class; and 6 the Matriculation, in this also one being placed in the first class. Of the former, one enters the Medical College, Madras, and another is going to Edinburgh to qualify for a medical degree. During the year, instruction in Canarese has been introduced into all forms below matriculation. As regards the junior forms, the two lowest, especially the second, seem to stand in need of some improvement.

Bishop Cotton's School.

113. This school also shews an increase of pupils, from 67 to 95, and here too changes have occurred among the subordinate masters, which have been, as far as I can judge, for the good of the school. A debt of over Rs. 4,000 on the building has been paid off during the year. It is therefore now free from any incumbrance of that nature. At the Matriculation examination, 5 candidates from this school were successful,

Saint Andrew's School.

Judging from the results of inspection, more animation seems required in the teaching of the highest class. The next is much better in this respect. The upper section of the first class did very well.

Wesleyan Institution.

114. *Anglo-Vernacular.*—The number of pupils in the Wesleyan Institution at the close of the year was 353 against 371 last year. Out of 24 candidates sent up for matriculation, 5 were successful. Special provision has been made for instruction in Tamil for those who require it, in addition to the usual English and Canarese course which obtains throughout the school. Physical science has been introduced into the matriculation and first classes, and object lessons into the two lowest. Arrangements are being made for similar instruction in the intermediate classes. At the close of the year, the Rev. Mr. Hudson, who has for a long time been at the head of this institution, and under whom it has continued to make marked and steady progress, was compelled by failing health to take leave to England.

London Mission Institution.

115. A further increase has to be reported in the numbers attending this school, which have risen from 239 to 274. The fees have yielded Rs. 2,057 against Rs. 1,795 last year. Eight students matriculated. This is the highest number ever passed from this school, and it is a most unusual and highly creditable circumstance that all who were sent up were successful. This speaks well for the preparatory training in the junior classes. Chikkanna Chetti, a student of this school, gained the silver medal for Canarese offered by Mr. Assistant Commissioner Srinivasaiengar to the student from Mysore who should pass highest in that language in the Matriculation examination. A course of public lectures on physical science was commenced by the Principal, the Rev. Mr. Walton. The experiments exhibited proved attractive and large native audiences were obtained. The subjects treated of were force, motion, machines, hydrostatics, pneumatics and acoustics.

Wesleyan School, Mysore.

116. The attendance is almost the same as reported last year. Of 8 candidates for matriculation, 2 passed. The Inspector reports that, of the year's work, the mathematical lessons had been taught with most success. But the knowledge of English in several classes ought to

have been better, and the vernacular tuition, generally, was unsatisfactory. The Rev. Mr. Haigh is now at the head of the school.

Saint Joseph's Seminary.

117. The strength of this school has increased from 207 to 229, according to the annual returns; but the average attendance appears to be very far below this, the absentees being in the proportion of 44 per cent. The inspection report is on the whole favorable. The third and fourth classes, however, seemed to need more careful instruction in some points. The Rev. Mr. Clemot, who has for several years ably conducted this institution, has been lately transferred to other work, and is succeeded by the Rev. Mr. Neveu. Some of the senior boys have been formed into a brass band, and the Rev. Mr. Vissac has taken much pains to ground them in the theory of music.

B. Aided Schools of the Middle Class.

Saint John's School.
Ordnance School.

118. *English.*—The attendance at *Saint John's Boys' School* is somewhat less than last year, or 54 against 60. The Head Master is reported to require more assistance for the lower classes. The third class did not do well at the inspection. It contains several native boys,

whose acquaintance with English is not such as to enable them to keep pace with the others. The *Ordnance School* contains 39 pupils against 45 last year. The parents of the children are stated to be often transferred from one station to another, and this frequent change among the boys and girls who come for instruction keeps the school at a low standard.

119. *Anglo-Vernacular.*—The greatest increase in attendance among these schools has taken place at *Saint Patrick's*, the numbers of which have risen from 76 to 164. The two London Mission schools, which are branches of the central institution, continue to do important work in their respective localities. The *Cantonment School* is reported to be in need of enlargement, in order to accommodate a number of applicants who cannot now be received. The *Jaghirdar's School*, though under a good master, does not make much progress, owing apparently to irregular attendance of the pupils. The demand for English instruction here appears very limited. The report on *Saint Mary's* is favorable. There is a small printing establishment now attached to it.

London Mission Cantt. School.
" " Alsur School.
Saint Mary's Seminary.
Saint Patrick's "
Jaghirdar's School, Yelandur.

120. *Canarese.*—The five schools under this head are the same as entered in last year's report. The London Mission School at *Malur* was not well reported on: that at *Anekal* seems to have been closed for a time, to allow of the premises being rebuilt, on which account inspection was postponed. Of the Wesleyan schools, the *Market Street School*, *Mysore*, is the best. It has a large attendance and is conducted on a spirited and efficient manner. The *Fort School*, *Túmkúr*, and the *Pete Main Street School*, *Bangalore*, are fair, but require close supervision.

121. *Tamil and Telugu.*—The *Chatur-Veda-Siddhanta-Sabha* Seminaries, which come under this head, have not this year kept up their former good reputation. The reason appears to be that two masters, whom it was found necessary to remove, set up a school of their own in opposition and drew away a large number of the boys. More recent arrangements seem to promise a restoration of the former prosperity of the seminaries.

122. *Sanskrit.*—The main object of the Sanskrit schools, as stated in previous reports, is the instruction of Brahmans alone, principally Vai-

dikas, in Sanskrit exclusively, for the purpose of training them as pandits, and purohitas or family priests. But, as the teachers are men who have gained a reputation by their learning, and the material they have to work on embraces some of the acutest intellects among the rising generation, Government aid has been extended to the most systematically conducted, on the understanding that secular knowledge, such as arithmetic and studies in the vernacular language, is imparted in addition.

123. The best of the schools now is the old established institution at *Melkote*. Its standard is the highest, and it is under careful and efficient management. The *Sravan Belgola School*, purely a Jain institution, is also very favorably reported on for system and attainments. The *Chikballapur School* fully maintains its high and well-established reputation. The same may be said of the newer *Muttur School*. The least satisfactory is the one at Seringapatam. Pandit Jagannath Achari appears to have little authority over the masters and students, who with proper arrangements are capable of much better results. The Bangalore *Samskrita Vidya Nilaya* is also poorly reported on.

124. *Persian and Hindustani.*—Of these schools, the Bangalore Madrasas are the largest, and take the lead. *Madrasa Muhammadia* is placed first in the inspection report, and *Madrasa Sultani*, though strong in Arabic, is said to be weak in arithmetic and some other points. The *Khudusi* and *Islamia Madrasas* are stated to be in a satisfactory condition as regards order and discipline. The *French Rocks School* is a good one, and the others have gained more or less favorable reports.

C. Aided Schools of the Lower Class.

125. *English.*—The report on the *Cantonment Orphanage* is more favorable than that of last year. It contains 25 boys and 26 girls, of whom the latter are the most advanced. Three of the elder boys are apprenticed out as printers, but sleep and have their meals at the Orphanage. The girls do all the cooking in turns, and also learn needlework and other domestic duties. The appointment of an assistant appears to be desirable for teaching the classes. *Saint Mark's Ragged School* has changed its designation to *Saint Mark's Infant School.* To the 45 children, mostly it is believed children of drummers in the Native Regiments, there is only one mistress, who, in addition to teaching them, has to cook the midday meal they receive at school. The necessity for better arrangements has been brought to the notice of the chaplain. The school is very elementary. *Saint Andrew's Poor School* is a newly established one, and is doing much good in educating, together with a partial allowance of clothing and food, Eurasian children of both sexes, to the number of 82, who were not previously under instruction.

Cantonment Orphanage..
Saint Mark's Infant School.
Saint Andrew's Poor School.

126. *Anglo-Vernacular.*—*Saint Paul's School* has made great improvement under the present master, who has been trained in the Normal School at Madras. The attendance has also risen considerably. The *Wesleyan Orphanage* is well reported on. Also the Tamil branch of the *Mysore Catholic Schools.* The remainder are mostly in need of more efficient arrangements, which have been brought to the notice of the managers.

Blackpalli Catholic Schools.
Mysore " "
St Paul's School, Bangalore.
Wesleyan Orphanage, Túmkúr.
" School, Broadway.

127. *Canarese.*—There are 11 schools under this head, 9 of which belong to the Wesleyan Mission, one is the Catholic School at Shethalli, and the remaining one the Chetnahalli Branch School maintained by Mrs. Fitz Gibbon of the neighbouring coffee estate. Of the Wesleyan Schools, those at *Kadaba* and *Kyatsandra* seem to be doing best. The *Túmkúr* School is also very good. Efforts are being made to improve the others in such points as have been noted by the Inspectors.

128. *Tamil and Telugu.*—There are 6 of this class, all in Bangalore. Those under the management of the Wesleyan Mission are reported to

be in a prosperous and satisfactory condition. The Blackpalli Catholic School seems to be ill provided with teachers.

129. *Hindustani.*—This head includes 16 schools, in various parts of the country. The one at Davangere appears to be the best. Those at Chintamani, Honnali, Nelamangala and one or two others are fair. But most of them are far from satisfactory. They meet a certain want, but it could be wished that more regularity and method could be imported into them. Some make progress for a short time under pressure, then interest again flags, and they sink to the same low condition as before. It is difficult to ensure sustained effort on the part of the managers.

984	0—7—8	1,287	636	310	2,233

D. Aided Female Schools.

130. *Higher Class.*—The attendance at *Bishop Cotton's* is nearly the same, or 71 against 75 last year. Of the 5 students of the college class, one has become a teacher in the school. The lower classes are making fair progress. Plain needlework, with knitting and darning of stockings, have been regularly taught, but the materials have to be supplied by the mistress, as the pupils rarely bring their own. Instruction in cookery, as required by the Government of India, has not as

Bishop Cotton's School.
Wesleyan School.
Convent of the Good Shepherd.

yet been arranged for. There are no doubt difficulties in the way ; but, if the thing can be properly done, practical lessons on the subject cannot fail to prove interesting as well as highly useful to the senior girls, perhaps more so than Latin, Algebra and Euclid.

131. The *Wesleyan School* shews 67 girls on the roll against 60 last year. Some changes have been made in the teaching staff, and of the assistant mistresses two are certificated teachers. The report on the school is favorable. The map-drawing is specially referred to as good. Plain and fancy needlework is taught in all classes, and the senior girls learn how to cut out and make up gentlemen's shirts, &c.

132. The *Convent* has the same number of girls as last year, 225. They are divided between a first class school, a second class school and an orphanage. The inspection report is satisfactory throughout. The youngest girls in the lower school had learned the multiplication table as a chant.

133. *Middle Class.*—Of the English schools,—*Saint John's* and *Miss Fergusson's*,—both are reported to be making fair progress. Of the Canarese schools, the one established by the Wesleyan Mission in the *Túmkúr Fort* is satisfactory. The *Chitaldroog* School is interesting from the fact of its being conducted by a Lingayat mistress under a native committee. It is desired that Government would take over the school. The *Siddikatte* School is doing well, but the *Shimoga* School seems to have lost ground. The Tamil schools, namely the *Hindu Female School* and the *Alsur Caste Girls' School* are reported by the Deputy Inspector to be model schools, growing in public favor, well attended, having good teachers and a source of satisfaction to the parents of the girls. The *Telugu Girls' School* of the 36th Regiment, Madras Native Infantry, I had the pleasure of visiting in company with the Commandant. The premises are very confined, but I was glad to see evidence that good work is being done. The enterprize is one that reflects credit on its promoters.

134. *Lower Class.*—The English School at Mysore, *Saint Bartholomew's*, is well reported of. The *London Mission Boarding School* also keeps up its established good reputation. Of the Canarese schools, the 4 under the London Mission in Bangalore, with 427 pupils ; the 3 under the Wesleyan Mission in Mysore, with 272 ; one in Bangalore, with 176 ;

one in Túmkúr, with 111 ; and one in Gubbi, with 76 ; are severally and altogether doing very important work, and in the superintendence of European ladies possess advantages that Government schools cannot lay claim to. They are all reported on in highly favorable terms. The *Fort School*, *Mysore*, is an important one, attended by girls of Brahman and Arasu families residing near His Highness' Palace.

135. The *Shethalli Catholic School*, for girls of the Christian agricultural community of that neighbourhood, continues satisfactory. The *Seringapatam School* is indifferently reported on. The Tamil schools are 3 in number,—the Catholic schools at *Blackpalli* and *Mysore*, and the *Saint Paul's Schools*, the total attendance being 162. In all three, the arrangements for teaching and supervision are stated to be defective. The two Hindustani schools are described as satisfactory, a report which I am very glad to receive.

E. Aided Schools for Special Education.

136. The aim and operations of this Association were described in last year's report. An application to the Government of India for a grant from the public funds in furtherance of its efforts, resulted in the sanction of a

Anglo-Indian-Aid-Association.

sum of Rs. 200 a month from the 1st of January, subject to the following conditions, proposed by the Chief Commissioner :—

That the Association has 40 youths on its rolls, of whom at least two-thirds must be under definite engagement as apprentices.

That if the above standard be not attained during any period of 3 months, the grant shall be reduced thereafter to Rs. 100, provided that 20 lads are maintained by the Association, with the same proportion of articled apprentices.

To which the Government of India added;

The understanding that a certain amount of education will accompany the industrial training of the boys; and—

That the charity will be strictly confined to proper objects.

137. In accordance with these directions, and in fulfilment of the prescribed conditions, the following particulars regarding the numbers connected with the Association on the 31st of March have been furnished. There were, at that time, 51 boys between the ages of 6 and 18, and 21 girls between the ages of 5 and 14 attached to the Association. These were distributed as follows :—

Boys.—21 in the Industrial School, of whom 5 are being trained as carpenters, 1 as an ironsmith, and 15 as mechanics.

7 apprenticed to the Examiner Press as printers.
2 „ „ Messrs. Eagan and sons as shoemakers.
1 „ „ Mr. Farmer as a farrier.
2 „ „ the Caxton Press as printers.
4 „ „ the Victoria Iron Works as mechanics.
3 „ „ Messrs. Cowley & Co. as stone masons.
11 in the Shule Ragged School.

Girls.—21 Do do.

Some arrangements seem to be required for giving girls industrial training, but the subject is naturally beset with difficulties which do not present themselves in the case of boys.

138. The Apprentice Act has been introduced into Mysore during the year, on representations made by the Association.

139. *St. Andrew's Poor School* is one that originated in the same movement though not directly connected with the association. It has been established by the Scotch Chaplain in Mutucheri, in the heart of a quarter inhabited by the poorer classes of Eurasians.

F. Private Unaided Schools.

140. The schools, according to the returns received, are 1,350 in number, with an attendance of 17,882 pupils ; as against 1,336 last year, with 17,056. The statistics, as previously stated, cannot be absolutely relied on, but an endeavour will be made during the ensuing year to obtain a trustworthy statement. It appears that 1,230 schools are Hindu, 38 Muhammadan and 17 Christian. The income of the schools is given as Rs. 38,293, of which Rs. 38,113 was realized from fees.

141. The distribution of the schools is as entered in the accompanying statement. There is a decrease in Shimoga and Kadur Districts, and a slight increase in Bangalore and Chitaldroog. The other Districts remain about the same. The attendance has increased in Bangalore and Mysore by nearly 1,000, in Túmkúr by 300. In all others, except Chitaldroog, which has 130 more, the attendance has fallen. The average number of pupils to each school is 13.

District.	Schools.	Pupils.	Average.
Bangalore ...	269	5,360	19
Kolar ...	104	1,380	13
Túmkúr ...	276	3,091	11
Mysore ...	150	1,687	11
Hassan ...	150	1,490	10
Shimoga ...	46	772	16
Kadur ...	104	1,140	11
Chitaldroog ...	261	2,962	11½

142. In the notice by the Government of India, just received, of last year's Report, it is remarked that sufficient information is not given about the private unaided schools. In regard to this I may point out that my former reports, as noted in the margin, contained such exhaustive information on the subject that there is really nothing left to add. The character of the schools and the course of study remain the same. Some have introduced several of our school books, because of their cheapness ; but only a few boys have them. And one or two of these pupils have not infrequently been sent to a neighbouring Government school for a time to gather explanations and hints as to their

Report for 1872—73, para 126—132.
" 1868—69, " 99—111.
" 1867—68, appendix IV.

use, which are retailed to the master ; who then appoints the best informant as a monitor, to teach what he has picked up, and to uphold the credit of the school if an Inspector should visit and examine it.

VII. BOOK DEPARTMENT.

Stock.

143. The stock of books in the Central and Branch Depôts on the 31st March 1876 was of the value of Rs. 53,716. There were added during the year to the Central Depôt 41,210 books, at a cost of Rs. 22,990. The number of books supplied to Branch Depôts for sale was 27,047, valued at Rs. 9,898.

Sales.

144. The amount realized by sales of books, and paid into Government treasuries, was Rs. 18,808, which shews an advance over the returns of last year. I regret that our means of supplying and transmitting school books are still very inadequate to meet the continually increasing demand. In addition to the educational branch of the Government Press, use has been made of private presses for bringing out large editions speedily of elementary school books.

145. The following were printed during the year for the Department :—

Anka Ganita, Arithmetic in Kanarese	10,000	copies.
Urdu Selections	1,000	,,
Alphabet Cards in Hindustani ..	1,000	,,

146. The Anka Ganita has been thoroughly revised and extended. So also has the Bhu-vivarane : a geography in Canarese, since sent to press. The right was purchased of bringing out a Canarese edition of the Second Part of Mr. Stapley's Graduated Translation Exercises, completing the work. The First Part has already been introduced into the Anglo-vernacular schools, and the whole will provide a system of instruction in English through the medium of Canarese which has long been much needed.

147. The following books were also purchased for the Department :—

Jaimini Bharata	200	copies.
Someśvara Śataka	400	,,

Village Dialogues, Canarese and English	100	copies.
Pancha Tantra	50	„
Morris' History of India, Canarese ..	100	„
Telugu First Book	200	„
„ Second „	100	„
„ Third „	50	„
Telugu Grammar	100	„
Karima	250	„
Hikayat Latifa	250	„
Akhlakh e Muhammadia	50	„
Maps of Europe and Asia, Urdu ..	19	„

VIII. LITERATURE.

148. The following is a summary taken from the separate report submitted on works published in Mysore in 1875. The total number of publications was only 38, against 56 the year before. There were 20 books and 18 pamphlets. All the works were in Indian languages; 28 being in Canarese, 1 in Canarese and Telugu, 4 in Hindustani; and of classical languages, 1 in Sanskrit, and 4 in Sanskrit and Canarese.

Subject.	1873.	1874.	1875.

Travels and Voyages ...	...	...	...
Total	31	56	38

149. Continuing my inquiries after ancient manuscripts, I was fortunate in obtaining the following during the year.

Kávya Sára.—gems from the works of ancient Canarese poets, classified according to subjects. This is an interesting and valuable work, copied by Abhinava Vádividyánanda Svámi for the Bhairági lord of Bhallátati-pura. It contains extracts from Aggala, a poet of the 12th century; from the Jagannáthavijaya of Rudra Bhatta; and from many other poets less known.

Bharata Sára--by Chandra Sekhara Kavi.

Abhinava Bharata Sára Sangraha, composed for Madhugiri Mummadi Chikka Bhúpa, a feudatory of Bijjalanka Ráya of Kalyána-pura, and therefore of the 12th century.

Grihya Tátparya Darsana, a commentary on the Apastamba Grihya Sútra, by Sudarsanáchárya.

Hari Vamsábhyudhaya, a life of Krishna according to the Jains. Composed in Canarese by Bandhu Varmma, perhaps one of the three Varmmas who form the most ancient trio of Canarese authors whose works have come down to us.

Neminátha Purana, by Karnapárya, in difficult old Canarese.

IX. SCHOOL BUILDINGS.

150. A school house at Húnsúr on the first class standard design, commenced last year by the Public Works Department, was almost completed. The enlargement and improvement of the Central College premises was begun, also by the Public Works Department.

151. The following school houses, according to the new design were undertaken by this Department—Hosdurga, Sidlagatta, Gudibanda, Kankanhalli and Goribidnur. The progress of the works was much delayed by outbreaks of cholera, which kept away the needed workmen.

152. A grant of Rs. 1,070 was made to supplement local subscriptions towards the erection of a building for the Hindustani School at Chikmagalur. Suitable premises were also purchased for the Taluk schools at Closepet and Chamrajnagar, at a cost of Rs. 1,014 in the former place and of Rs. 1,260 in the latter.

153. Repairs were carried out to 22 school houses, at a total cost of Rs. 4,079: the amount of the estimates varying from Rs. 890 to Rs. 17. The school ground at Maddagiri was enclosed at a cost of Rs. 176; and a well sunk for the Yelahanka school at a cost of Rs. 16.

CONCLUSION.

154. I may perhaps in concluding refer to the disappointment felt, in common with the whole of the Province, by the school children of Bangalore, that His Royal Highness the Prince of Wales was prevented from paying his intended visit to Mysore. It had been arranged that all the schools in Bangalore should be assembled at the Band Stand for the occasion, and it may be of interest to record that the number of children

would have exceeded 7,000. About 1,500 were Europeans and Anglo-Indians, and the remainder Natives. Girls numbered about 2,500. The Native private schools, unconnected with Government, were 73 in number; namely, from the Petta, 35 Hindu schools with 581 pupils; from the Cantonment, 12 Hindu schools with 327 pupils, and16 Muhammadan schools with 407 pupils.

155. The Department has been fortunate in a continuance of that interest in educational proceedings on the part of the Honorable Mr. Dalyell, officiating as Chief Commissioner throughout the year, which it was always our privilege to enjoy under Sir Richard Meade. For which, and for the encouragement extended to so many schools by personal visits and rewards while on circuit in the Districts, our sincere thanks are due.

156. It gives me pleasure also again to express our thanks for the assistance received from all Officers of the Administration in regard to the schools situated in the several localities under their control.

157. The services of the members of this Department, executive and instructional, have been brought to notice in the body of the report in connection with their respective charges and are here cordially acknowledged.

I have the honor to be
Sir,
Your most obedient Servant,

L. RICE,
Director of Public Instruction, Mysore.

APPENDIX I.

Plan of Studies for the School of Engineering and Natural Science, Bangalore.

UPPER DEPARTMENT.

FIRST YEAR.

FOR ALL DEPARTMENTS.

I. **Mathematics.**—*Algebra.*—Text book—Todhunter's Algebra for Colleges and Schools, from Chapter 35 to Chapter 51 inclusive. Binomial and Multinomial Theorems, Logarithms, Exponential and Logarithmic series, Convergence and Divergence of series, Interest, Annuities, Continued Fractions, Reduction of a Quadratic Surd to a Continued Fraction, Indeterminate Equations of the 1st and 2nd degree, Partial Fractions, and Indeterminate Coefficients, Recurring series, Summation of series and Inequalities. For the F. A. Examination, the students have to study Algebra up to Exponential and Logarithmic series, so that the first part of the course is only a repetition.

Geometry.—Text book—Todhunter's Euclid: Repetition of XI Book and application of the Theorems for the mensuration of planes and bodies.

Trigonometry.—Text book—Todhunter's Plane Trigonometry for the use of Colleges and Schools—The whole book. For the F. A. Examination the students have to get up the first 19 Chapters, so that the additional work is only DeMoivre's Theorem, Expansion of Trigonometrical functions, Exponential values of the sine and cosine, Summation of Trigonometrical series, Resolution of Trigonometrical expressions into factors, about 80 pages; but the whole of the Trigonometry to be gone through again, with special consideration of the numerical solution of triangles, measurement of heights and distances, and application of Trigonometry to the solution of problems in surveying.

Plane Co-ordinate Geometry.—Text book—Todhunter's Plane Co-ordinate Geometry as applied to the straight line and conic sections. The whole, with the exception of Chapters 4, 7, 14, 15 and 16. This includes the essential properties of the straight line, circle, parabola, ellipse, hyperbola considered in rectangular, oblique, and polar co-ordinates. The study of this part of Mathematics is very essential for the understanding of Mechanics.

Theory of Equations.—Todhunter's Elementary Treatise on the Theory of Equations. The first 20 Chapters containing the property and numerical solution of Equations.

Co-ordinate Geometry of three dimensions.—No text book. The problems which can be demonstrated by the help of leementary Mathematics to be considered only; these include planes, straight lines and simple bodies of Revolution. The elements of this part of Mathematics are deemed essential for the demonstration of mechanical problems.

II. Surveying.—Text book—Roorkee Treatise on Surveying. During the first year Chain Survey and Prismatic Compass Survey. Work in the field and plotting.

III. Drawing.—Copying drawings of buildings, &c. Theory of drawing, Orthographic Projection as far as projection of solids.

IV. Mensuration and Estimating.—Madras Engineering College Treatises. Evan's Mensuration and Schowry's Estimating. The first book treats of the mensuration of areas and solids and the second contains estimates of the ordinary works of the Department Public Works.

SECOND YEAR—FIRST HALF YEAR.

For All Departments.

I. Mechanics.—*Statics and Dynamics.*—Todhunter's Mechanics for Beginners—The whole. Parallelogram of Forces, Parallel Forces, Forces in one Plane, Centre of Gravity, Mechanical Powers, Friction, Forces not acting in one plane. Newton's three laws of motion with application to pendulum, motion in a circle and in a conic section as far as it can be demonstrated by elementary Mathematics. To the above the following additions to be made.

Theory of couples.	Internal Stress—its composition and resolution as far as it can be demonstrated by elementary Mathematics.
Stress—its resultants and centre.	

Hydrostatics and Pneumatics.—Text book—Galbraith and Haughton's Manual of Hydrostatics—The whole, containing equilibrium of Liquids and Gases, Specific Gravity. Instruments and Machines as Pump, Siphon, Hydraulic Press, Air Pump, Safety Valve.

II. Surveying.—Continuation of first year's course—Adjustments of Levels, Levelling, taking cross-sections and contours. Plotting.

III. Drawing.—Continuation of first year's course—Drawing from specification. Theory of drawing, Intersections of planes with bodies.

IV. Mensuration and Estimating.—Continuation of first year's course.

SECOND HALF YEAR.

For Department Public Works.

Hydraulics.—Discharges from Orifices, Weirs and Notches, flow of water in uniform channels and in pipes. Flow of water in rivers. For this subject no text book has yet been decided upon.

Applied Mechanics and Strength of Materials.—Text books—Roorkee Treatise on applied Mechanics Part I and Part II. Examples of Applied Mechanics by Elliott (Roorkee)—Part I of the Roorkee Treatise on Applied Mechanics contains the theory of the strength of materials, stress in Roof Trusses and the commencement of "Transverse strain," and until the publication of the 2nd Part the theory of the strains in wooden and iron girders, the stability of arches, retaining walls and embankments, must be dealt with in lectures based, as much as possible, on the Roorkee Treatise of Civil Engineering.

II. Surveying.—Continuation of course—Levelling, Adjustment and use of Theodolites.—Plotting and field work.

III. Drawing.—Drawing from specification, theory of shadows, Isometrical Projection and the elements of Perspective.

IV. Mensuration and Estimating.—Continuation of course.

FOR TOPOGRAPHICAL AND REVENUE SURVEY DEPARTMENTS.

I. Map Drawing.
II. Advanced course of Surveying.
III. Practical Surveying, same as for Department Public Works.

FOR FOREST DEPARTMENT.

ELEMENTS OF METEOROLOGY.

Laws of temperature and atmospheric pressure—Phenomena of rain, dew and moisture.

ELEMENTS OF BOTANY AND VEGETABLE PHYSIOLOGY.

Drawing.—Free hand drawing, specially plants.

Surveying.—The same as Department Public Works.

THIRD YEAR.

FOR DEPARTMENT PUBLIC WORKS.

Constructive Engineering.—Text book—Roorkee Treatise on Civil Engineering, Preparation of materials, Construction of buildings, bridges (in wood, brick, stone and iron,) roads, well, tank and channel irrigation, and the elementary parts of the construction of Railways. Plans and estimates to be prepared for the above works.

Surveying.—Theodolite surveying with special consideration of surveys for roads and irrigation works. Spherical Trigonometry as far as the solution of triangles.

ELEMENTS OF CHEMISTRY AND GEOLOGY.

FOR TOPOGRAPHICAL AND REVENUE SURVEY DEPARTMENTS.

Advanced Course of Surveying.—With special consideration of Topographical surveying. Spherical Trigonometry as far as the solution of triangles.

Map-Drawing.—Contour drawing from models.

Surveying.—Making a moderately large Topographical Survey. Circuits with Theodolite, details with Prismatic Compass and plane table.

ELEMENTS OF CHEMISTRY AND GEOLOGY.

FOR FOREST DEPARTMENT.

Advanced Course of Botany and Vegetable Physiology. Timber trees of Southern India. Elements of Chemistry and Geology.

Free hand drawing, specially plants.

LOWER DEPARTMENT.

I CLASS.

FIRST YEAR.

FOR ALL DEPARTMENTS.

I. Mathematics.—*Algebra.*—Todhunter's Algebra for Colleges and Schools, Chapters 9—28, 30—36 and 39. Equations of first degree, Involution, Evolution, Theory of Indices and Surds. Quadratic Equations. Ratio and Proportions. Variations, Arithmetical, Geometrical and Harmonic Progressions, Permutation and Combination, Binomial and Exponential Theorems.

Geometry.—Todhunter's Euclid, Books I, II, III, IV, VI and XI. Repetition of Books I to III and Books IV, VI, and XI, with applications to the solution of simple Geometrical problems.

Trigonometry.—Todhunter's Trigonometry for Beginners.—The whole, with exception of Chapter 24. Trigonometrical ratios, solution of triangles, use of Logarithms, with special consideration of the numerical solution of triangles and application to surveying.

Mechanics.—Todhunter's Mechanics for Beginners. Statics, the first nine Chapters, containing Parallelogram of Forces, Forces acting in one plane, Resultant of Forces. Moments, Centre of Gravity.

II. Surveying.—Text book—Roorkee Treatise on Surveying. Chain Survey and Prismatic Compass Survey. Work in the field and plotting. (This is the same as for the Upper Department and both classes are taught together.)

III. Drawing.—Copying of drawings of buildings. Theory of drawing. Orthographic Projection as far as projection of solids. In conjunction with Upper Department.

IV Mensuration and Estimating.—Madras Engineering College Treatises. Evan's Mensuration and Schowry's Estimating. The first book treats of the Mensuration of areas and solids, and the second contains estimates of the ordinary works of the Department Public Works. In conjunction with the Upper Department.

SECOND YEAR—FIRST QUARTER.

For All Departments.

I. Mechanics.—Continuation of Statics 10-19, Lever, Balance, Wheel and Axle, Pully, Inclined Plane, Wedge, Screw, Friction.

Dynamics.—The first 4 Chapters. Velocity, fall of bodies under the action of Gravity.

Hydrostatics.—Galbraith and Haughton's Manual of Hydrostatics. Equilibrium of Liquids and Gases, Specific Gravity, Pump, Siphon, Hydraulic Press, Air Pump, Safety Valve.

II. Surveying.—Continuation of first year's course.—Adjustment of Levels, Levelling, taking cross-section, Plotting. In conjunction with Upper Department.

III. Drawing.—Continuation of first year's course.—Drawing from specification. Theory of Drawing. Intersection of planes with bodies. In conjunction with Upper Department.

IV. Mensuration and Estimating.—Continuation of first year's course.—In conjunction with Upper Department.

SECOND YEAR, 2nd, 3rd AND 4th QUARTERS.

For the Department Public Works.

Hydraulics.—Discharge from Orifices, Weirs and Notches, and flow of water in uniform channels. The simplest cases only to be considered.

Strength of Materials.—Roorkee Treatise on the strength of materials, containing the simplest cases of Crushing, Tension and Transverse Strains.

Applied Mechanics.—Simple examples on the stability of ordinary roofs, bridges, abutments and embankments. No text book selected as yet.

Preparation of Materials.—From Ford's Notes. New edition.

Constructive Engineering.—Buildings, Bridges, Roads and Irrigation works. Selections from the Roorkee Treatise on Civil Engineering; the simplest cases only.

II. Surveying.—Continuation of previous course. Levelling, cross-sections, contours and plotting. In conjunction with Upper Department.

III. Drawing.—From Specifications.

IV. Mensuration and Estimating.—Continuation of course.

FOR TOPOGRAPHICAL AND REVENUE SURVEY DEPARTMENTS.

I. Map Drawing.
II. Surveying with Theodolite and plotting by Traverses.

FOR FOREST DEPARTMENT.

Elements of Botany.—Timber trees of Southern India.

LOWER DEPARTMENT.

II. CLASS.

For Sub-Overseers, Draughtsmen, Estimators and Sub-Surveyors.

Entrance Examination for those candidates that have not passed the Matriculation Examination.

1. Arithmetic.
2. Algebra as far as Simple Equations (inclusive).
3. Euclid, the first two Books.

I. Preparation of materials and execution of the ordinary works of the Public Works Department from Ford's Notes.

II. Drawing.—Copying plans of Buildings, Bridges, &c.

III. Mensuration and Estimating.—Evan's Mensuration and Schowry's Estimating. Mensuration of areas and solids, and estimating for the ordinary works of the Public Works Department.

IV. Surveying.—Surveying with Chain and Prismatic Compass. Adjustment of Levels, Levelling, taking cross-section. Plotting simple surveys, lines of levels and cross-sections.

APPENDIX II.
